

Alex Beuscher

AI Engineer · LLM Application Developer

Amherst, MA · alexbeuscher@gmail.com · 617 359 6971 · alexbeuscher.com · github.com/abeuscher · linkedin.com/in/alex-beuscher-8314157

Engineer building production LLM applications — RAG systems, multi-provider architectures, and agentic workflows — on a 25-year full-stack web foundation. Shipped a nine-engine medical AI assistant and an AI-native platform solo, and integrate LLMs across the OpenAI, Anthropic, Gemini, and Mistral ecosystems.

Skills

AI/LLM: LLM application architecture, RAG, agents & agentic-coding workflows, evaluation, multi-provider integration (OpenAI, Anthropic, Gemini, Mistral) · Full-stack: JavaScript/TypeScript, PHP/Laravel, React, Vue.js, Node.js, PostgreSQL · Platforms & tools: Filament, Sanity.io, Contentstack, AWS, Git

EXPERIENCE

Creator — MAIA (Medical AI Assistant) · Remote · Jan 2024–Apr 2025

Open-source medical AI assistant for the HIE of One initiative.

- Architected and built an assistant integrating **nine LLM engines** with consent-based access to a patient's EHR timeline, returning tailored guidance.
- Became the **reference implementation** for an international hackathon (Dec 2024), with teams in India, the UK, and elsewhere building on it.

Founder & Lead Engineer — NpHelper · Amherst, MA · 2025–Present

AI-native open-source CRM/CMS for small nonprofits.

- Built the full product solo on Laravel / Filament / PostgreSQL using agentic-coding workflows to ship at a scope that normally requires a full team.

Independent AI & Web Consultant · Amherst, MA · 2024–Present

- AI integration and education for nonprofit and private clients; train practitioners on safe, effective integration of LLM tooling into professional workflows.
- CRM migrations and web development.

Lead Web Developer — Skydio · San Mateo, CA · 2021–2023

- Marketing site on an Eleventy / Sanity.io stack; led two developers, a designer, and contractors; GDPR/CCPA compliance.

Senior Web Developer & Team Lead — Contentstack · Remote · 2020–2021

- Led a remote team in Mumbai building marketing sites on a headless CMS with Gatsby.

Earlier — Senior Web Developer roles at **Dynamic Signal** (2017–2021) and **2K Games** (2013–2017): full-stack web, headless/CMS platforms, security, localization, and compliance.

Education — B.A., Writing, Literature & Publishing — Emerson College

Other — Voice-over artist (portfolio available on request)
